Church member reading his prayer

Model of future church building

Construction on our church and our pre/kinder school has begun! Praise Almighty God! We are building a 60 X 60 foot two level building. The top level (seen in photo above) will be the church. However, it will also consist of the church office, a kitchen, bathrooms, and a multipurpose room. The bottom level (our school) will consist of classrooms, an office, a kitchen, bathrooms, and a cafeteria area.

School (bottom level) and church

Recently, we held a prayer service for the construction process. Every member of the church prepared and then read their prayer in front of the congregation. We then took the prayers and placed them in a metal tube. We sealed the tube with all the prayers inside and then placed them in one of the columns. The column was then filled with cement -forever making our prayers part of the foundation!

Putting our prayer tube in the foundation

### **Philippians 4**

<sup>6</sup>Do not be anxious about anything, but in everything, by prayer and petition, with thanksgiving, present your requests to God. <sup>7</sup>And the peace of God, which transcends all understanding, will guard your hearts and your minds in Christ Jesus.

Looking up on the site towards the road

As you may have noticed from the church/school model the entrance to the school level is opposite the church entrance. The above picture is the view that a person has upon entering the school. Well, to be exact, the entrance is about eight feet in front of the man in the photo.

Looking down on the site from road

The view here (above) is from the church entrance. If a person would be inside the church and look out from where the stained glass window will be (see model) they would see these blue apartments.

### Psalm 127

<sup>1</sup> Unless the LORD builds the house, its builders labor in vain.

The photo below is of the back retaining wall of the school. Directly above it is the church main entrance. Because our land is hilly, the church and the school will both have ground level entrances.

Back retaining wall of school

### Prayer Requests

- For the safety of all our workers
- For our volunteer teams who are coming to help with construction
- For financial assistance to help complete our building
- For patience

Workers usually work from 7 until 3

Working to Advance His Kingdom,
